This Association Believes:

1. Live entries should be judged based on the stream as it was broadcast in its full, as any post-production editing means the entry piece is no longer the entry as broadcast live, and means that the live editing – which is a key factor of live broadcast and should be one of the featured judged – is no longer there. While it is true this means people won't watch the full broadcast (as it could exceed runtime of an hour), this Association believes that even skimming over and watching parts of the full broadcast will allow people to get a better idea of the quality of the entry as streamed live, over a ten minute edit of the broadcast which people are likely to skim watch anyway.
